

Kawasaki K3V180 barrel & port plate concave & convex surfaces.

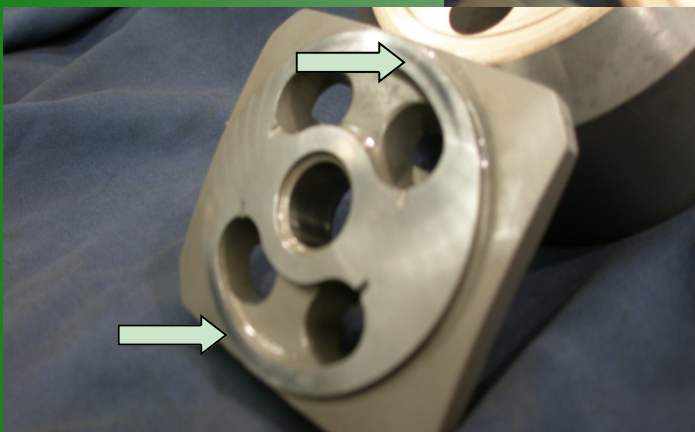

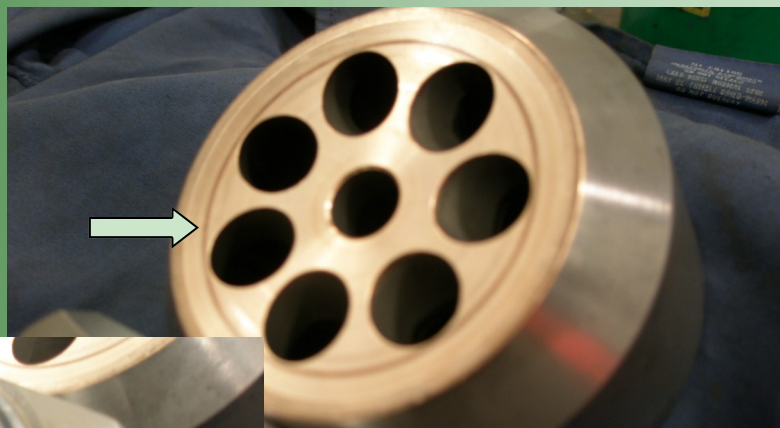

These parts have completed one tour of duty and will be “match lapped” and leak tested prior to delivery to the customer

OW! Look at that finish!!

We at Lapping Services are proud of the work we do and about the quality of finish we can produce. Just look at the quality of these finishes

Rexroth A6VM109 Barrel & port plate After Market Parts.

These new after market parts were assembled into a pump but failed on test. We at Lapping Services where called upon to “match lap” these parts. We did this and the pump achieved above 96% efficiency on the second test

We thought you could benefit from the services we provided

Lapping Services, Where Rigorous Process Ensures Consistent Quality
